I am a Self-taught Full-Stack developer, passionate about building modern web applications, and enjoys working on challenging problems. I was hooked on programming since the first encounter during my Electrical Engineering studies, after graduating in July last year I decided to become a web developer. Because I find it more challenging than the day-to-day EE work.

My previous exposure to programming made it easy for me to learn and “master” the leading web technologies and frameworks. Since then, I developed a website for a small business, a personal portfolio webpage, and multiple other noteworthy projects, like a full MEARN Stack Ecommerce website that you can see on my GitHub because I only included hosted projects on this resume.

TECHNICAL SKILLS

Languages	Libraries	Frameworks	Databases	Utilities	Other
<ul style="list-style-type: none">JavaScript(ESNext, Node.js)TypescriptHTML/CSS/SASPHP	<ul style="list-style-type: none">ReduxReactJSD3.jsThree.jsjQueryGSAP	<ul style="list-style-type: none">Next.jsBootstrapExpressJS	<ul style="list-style-type: none">MySQLMongoDB	<ul style="list-style-type: none">GitWebpackGulpTailwindCSSStyled-Components	<ul style="list-style-type: none">WordPressYarn Adobe XDSocket.ioFigmaDockerNpmBash+ Jest
