About Me

I 'm a front-end developer, passionate about building modern web applications, and enjoys working on challenging problems. I was hooked to programming since my first encounter during my Electrical Engineering studies, after graduating in July 2021 year I decided to become a web developer. because I find it more challenging than the day-to-day EE work.

I'm currently working as a remote front-end web developer, where I'm building the frontend of n ERP application by myself.

Work History

03/2023 - present

front end developer

Company : unoiaCode
Location : Tunis, Tunisia
Technology : vue.js, React Native

Eunoia Code is a small development agency, which focuses on CMR applications.

- wrote over 15 pages and dozens of components in an ongoing ERP project.
- leveraged many libraries and built very custom and unusual components.
- building mobile app related to the ERP.

Education

07/2021 - 03/2023

Immediately after graduating as an electrical engineer. I started self learning to become a web developer, I felt confident enough in 07/2022, I started interviewing in September 2022 and did quite well, but no one hired me because they did not believe that someone can learn by himself, and no one wanted to take the risk, I kept grinding and I eventually landed the job in 03/2023, this is what I did during my learning period :

- I followed the freeCodeCamp curriculum.

- Built countless of pet projects and few bigger ones.
- Learned many languages and frameworks such React.js, vue.js, node.js, express, next.js and databases SQL and mongo DB, and others like GSAP and Framer Motion ....

2017 - 2021

Institute : ENSIT (<u>The Higher National Engineering School of Tunis</u>)

Degree : National Engineering Degree (EE)

- Gained basic knowledge in telecommunications, programming and electronics.
- Gained a lot of specific electrical l engineering knowledge.

2015 - 2017

Institute : IPEIM (<u>Preparatory Institute for Engineering Studies of Monastir</u>)

Degree : passed to engineering school

- Learned the fundamentals of Math (Analisis and linear Algebra), physics, and chemistry.
- Improved my reasoning abilities and learned to learn by myself in a short time.

Projects

- Ecommerce website.
- npm package for communicating with remote devices.
- A small website for my friend
- built a desktop app that monitors and controls remote devices for a local company (graduation project).
- a study on the comparison of the methods of transformation of Histogram (university project).

Tech Skills

- Javascrit / Typescript
- Node.js
- React/React Native
- Vue.js
- Expres
- Next.js
- Mongo Db
- SQL
- Git / GitHub / Bitbucket
- npm / Gulp / webpack / Vite

Languages

English : Proficient

Frensh : Intermediate
